Hermès — Recruitment Team

Bobigny

Re: Application for ALTERNANCE - Ingénieur Chargé d'Analyse de Stock (H/F) (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the ALTERNANCE - Ingénieur Chargé d'Analyse de Stock (H/F) apprenticeship at Hermès in Bobigny, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in supply chain at a company I can stay with long-term.

Hermès's model — craftsmanship and independence maintained across nearly two centuries, with growth funded from operations rather than short-term financial engineering — is a genuinely distinctive way to run a global luxury house, and its functions have to protect that model while still expanding it internationally. I want to understand how a company grows deliberately, at its own pace, rather than by default at whatever speed the market allows.

Supply chain is where my engineering training and my commercial experience overlap. At NIT Calicut, I studied Supply Chain Management, Operations Research, and Production Systems Management as part of my mechanical engineering degree, and as an in-plant trainee at Hyundai Motor India, I saw plant operations and team structures firsthand. At GEP Worldwide, the procurement research I delivered was for a client's car fleet — a supply chain problem end to end.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
