Ironhack — Recruitment Team

Ville de Paris

## **Re: Application for Alternance - Consultant Cybersécurité (24-month apprenticeship, starting September 2026)**

Dear Hiring Manager,

I'm applying for the Alternance - Consultant Cybersécurité apprenticeship at Ironhack in Ville de Paris, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in strategy and consulting at a company I can stay with long-term.

Ironhack's bootcamp model — training career-changers into tech roles in a matter of months — puts its own operations under constant pressure to keep curriculum and practices current with an industry that moves faster than most training providers can track. Consulting on cybersecurity for an organization whose whole business model depends on staying current is exactly the kind of fast-moving, high-accountability environment I want to work in.

Strategy is my current job. At FORVIA, I support the strategic plan directly — studying new markets, tracking competitors and product lines, and factoring in geopolitical shifts. Before that, as a Business Development Executive at Endosys Technologies, I owned commercial outcomes directly, including a product change that raised sales volumes by 20%. ESSEC's Strategy and Management coursework has sharpened that experience, and I want to keep working on strategy that actually gets implemented.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

**Giridhar Dhananjay Khaza Venkata**
