Les Cuistots Migrateurs — Recruitment Team
Montreuil

Re: Application for Chargé.e de développement commercial - Traiteur engagé - Alternance (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Chargé.e de développement commercial - Traiteur engagé - Alternance apprenticeship at Les Cuistots Migrateurs in Montreuil, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in business development at a company I can stay with long-term.

Les Cuistots Migrateurs built a catering business around chefs who are refugees, which means its commercial development has to sell on food quality and genuine social impact at the same time, to corporate clients who increasingly expect both. Selling a proposition that has to prove itself on two dimensions at once — commercial and social — is exactly the kind of values-aligned business development I'd find most motivating.

Business development is where I started my career. As a Business Development Executive at Endosys Technologies, I marketed products through conferences, live demonstrations, and direct customer conversations, and one product change I proposed based on customer feedback raised sales volumes by 20%. At FORVIA, I now study how markets and competitors evolve as part of the strategic-planning process, so I've seen business development from both the front line and the analysis side.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
