Louis Vuitton — Recruitment Team
Paris

**Re: Application for Alternance – Assistant(e) Logistique Retail et Supply Chain France (F/H) -
Septembre 2026 (24-month apprenticeship, starting September 2026)**

Dear Hiring Manager,

I'm applying for the Alternance – Assistant(e) Logistique Retail et Supply Chain France (F/H) -
Septembre 2026 apprenticeship at Louis Vuitton in Paris, starting September 2026 for a 24-month
contract. I have three years of experience in business development, strategy consulting, and analysis,
most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for
an apprenticeship in supply chain at a company I can stay with long-term.

Louis Vuitton, as LVMH's flagship maison, runs supply chain and purchasing operations at a scale and
level of craftsmanship few luxury houses can match, coordinating raw materials, ateliers, and a global
retail network without ever compromising on quality. Understanding how a luxury supply chain
reconciles artisanal production with global logistics is exactly the kind of operational complexity I want to
study from the inside.

Supply chain is where my engineering training and my commercial experience overlap. At NIT Calicut, I
studied Supply Chain Management, Operations Research, and Production Systems Management as
part of my mechanical engineering degree, and as an in-plant trainee at Hyundai Motor India, I saw
plant operations and team structures firsthand. At GEP Worldwide, the procurement research I delivered
was for a client's car fleet — a supply chain problem end to end.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in
the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and
Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in
Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025),
with coursework in Operations Research, Project Management, Supply Chain Management, Quality
Planning and Analysis, and Production Systems Management. The engineering degree gives me a
technical grounding most business-school candidates don't have, and ESSEC has given me the
strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute
to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
