Merci Handy — Recruitment Team
Paris

Re: Application for Alternance – Business Developer & Commercial Terrain (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Alternance – Business Developer & Commercial Terrain apprenticeship at Merci Handy in Paris, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in business development at a company I can stay with long-term.

Merci Handy built a genuinely playful brand identity in a cosmetics category that's usually either purely functional or purely luxury, which means its field commercial team has to win retail placement on brand personality as much as on product performance. Selling a distinctive brand identity into a crowded retail category is exactly the kind of direct, persuasion-driven business development I did at Endosys Technologies, through live demonstrations and direct customer conversations.

Business development is where I started my career. As a Business Development Executive at Endosys Technologies, I marketed products through conferences, live demonstrations, and direct customer conversations, and one product change I proposed based on customer feedback raised sales volumes by 20%. At FORVIA, I now study how markets and competitors evolve as part of the strategic-planning process, so I've seen business development from both the front line and the analysis side.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
