Natixis — Recruitment Team

Paris

Re: Application for Alternance - 2 ans - Business Development F/H (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Alternance - 2 ans - Business Development F/H apprenticeship at Natixis in Paris, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in business development at a company I can stay with long-term.

Natixis's position inside the BPCE group, focused on corporate and investment banking and asset management, means its Business Development function has to build relationships and structure opportunities in one of the most competitive, relationship-driven segments of French finance. A 24-month apprenticeship there is exactly the length of engagement I'm looking for to go deep on one function rather than rotate through several, building on the client-facing and analytical experience I already have from GEP Worldwide and FORVIA.

Business development is where I started my career. As a Business Development Executive at Endosys Technologies, I marketed products through conferences, live demonstrations, and direct customer conversations, and one product change I proposed based on customer feedback raised sales volumes by 20%. At FORVIA, I now study how markets and competitors evolve as part of the strategic-planning process, so I've seen business development from both the front line and the analysis side.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
