Natixis Corporate & Investment Banking — Recruitment Team
Paris

Re: Application for Alternance - 1 an - Business Management Real Assets F/H (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Alternance - 1 an - Business Management Real Assets F/H apprenticeship at Natixis Corporate & Investment Banking in Paris, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in strategy and consulting at a company I can stay with long-term.

Natixis Corporate & Investment Banking's Real Assets business sits inside one of France's leading investment banks, where business management has to keep a genuinely specialized financing business — real assets, infrastructure — running with the operational discipline that lets bankers focus on deals rather than process. A focused apprenticeship there is exactly the high-intensity exposure to investment banking operations I'm looking for, building on the client-facing and analytical experience I already have from GEP Worldwide and FORVIA.

Strategy is my current job. At FORVIA, I support the strategic plan directly — studying new markets, tracking competitors and product lines, and factoring in geopolitical shifts. Before that, as a Business Development Executive at Endosys Technologies, I owned commercial outcomes directly, including a product change that raised sales volumes by 20%. ESSEC's Strategy and Management coursework has sharpened that experience, and I want to keep working on strategy that actually gets implemented.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
