Stellantis — Recruitment Team

Poissy

Re: Application for Apprentissage - Marketing Communication 360 (Peugeot France) (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Apprentissage - Marketing Communication 360 (Peugeot France) apprenticeship at Stellantis in Poissy, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in product and marketing at a company I can stay with long-term.

Stellantis operates at a scale few automotive groups can match — fourteen brands, from Peugeot and Citroën to DS and Opel, unified under one strategic roof while each brand keeps its own identity. That combination of centralized strategic direction and brand-level distinctiveness is exactly the kind of organizational complexity I find most interesting to work inside, and it mirrors the multi-team coordination (Finance, M&A, Sales, R&D, Operations, Purchasing, Legal) I currently navigate at FORVIA. Stellantis's push toward electrification and software-defined vehicles, run out of the Poissy Green Campus, is a transformation story I would value contributing to directly rather than reading about from the outside.

My path into marketing runs through two different roles: at FORVIA, I study the positioning of product lines and how markets evolve around them as part of the strategic-planning process; earlier, at Endosys Technologies, I was on the front line marketing physical products through conferences, live demonstrations, and direct customer conversations, and I translated what I heard back into product changes that increased sales. ESSEC's Marketing Management coursework builds on that practical foundation.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
