Stellantis — Recruitment Team
Poissy Green Campus (78)

Re: Application for Chargé de Gestion des Risques Fournisseurs (Apprentissage) (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Chargé de Gestion des Risques Fournisseurs (Apprentissage) apprenticeship at Stellantis in Poissy Green Campus (78), starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in procurement at a company I can stay with long-term.

Stellantis operates at a scale few automotive groups can match — fourteen brands, from Peugeot and Citroën to DS and Opel, unified under one strategic roof while each brand keeps its own identity. That combination of centralized strategic direction and brand-level distinctiveness is exactly the kind of organizational complexity I find most interesting to work inside, and it mirrors the multi-team coordination (Finance, M&A, Sales, R&D, Operations, Purchasing, Legal) I currently navigate at FORVIA. Stellantis's push toward electrification and software-defined vehicles, run out of the Poissy Green Campus, is a transformation story I would value contributing to directly rather than reading about from the outside.

As a Senior Analyst at GEP Worldwide, I worked directly on procurement: my market research on car fleet sourcing delivered a 6% saving for the client, and I regularly drafted and analyzed RFIs, RFQs, and RFPs from the buyer's side. At FORVIA, I now support Purchasing with competitor and market intelligence for their sourcing decisions. My mechanical engineering background means I can read a technical spec and a commercial term sheet equally well, which helps when cost, quality, and delivery all come up in the same negotiation.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
