Stellantis — Recruitment Team

Poissy (78)

Re: Application for Data Analytics for Customers Satisfaction Surveys and Quality Targets management (Apprentissage) (12-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Data Analytics for Customers Satisfaction Surveys and Quality Targets management (Apprentissage) apprenticeship at Stellantis in Poissy (78), starting September 2026 for a 12-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in analysis at a company I can stay with long-term.

Stellantis operates at a scale few automotive groups can match — fourteen brands, from Peugeot and Citroën to DS and Opel, unified under one strategic roof while each brand keeps its own identity. That combination of centralized strategic direction and brand-level distinctiveness is exactly the kind of organizational complexity I find most interesting to work inside, and it mirrors the multi-team coordination (Finance, M&A, Sales, R&D, Operations, Purchasing, Legal) I currently navigate at FORVIA. Stellantis's push toward electrification and software-defined vehicles, run out of the Poissy Green Campus, is a transformation story I would value contributing to directly rather than reading about from the outside.

Analysis has run through my whole career so far. As a Senior Analyst at GEP Worldwide, I turned raw data into decisions clients acted on, including the market research behind a 6% procurement saving. At FORVIA, I analyze competitors' technical and financial positioning for teams across Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal, so my analysis has to hold up under scrutiny from very different specialists at once. My mechanical engineering degree, with coursework in Operations Research and Quality Planning and Analysis, gave me the quantitative foundation for that, and PowerBI is part of my regular toolkit.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
