TotalEnergies — Recruitment Team
Courbevoie (92), La Défense

Re: Application for ALTERNANCE - Business Analyst / assistant coordinateur Plan Long Terme H/F (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the ALTERNANCE - Business Analyst / assistant coordinateur Plan Long Terme H/F apprenticeship at TotalEnergies in Courbevoie (92), La Défense, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in finance and controlling at a company I can stay with long-term.

TotalEnergies' transition from an oil-and-gas major into a broad energy company — spanning traditional hydrocarbons, renewables, and electricity — is one of the most consequential strategic pivots happening in French industry right now, and its functions have to make that transition commercially real, not just declared.

At FORVIA, part of my role is producing the technical and financial competitor analysis that the Finance and M&A teams use directly, so my numbers have to hold up to real scrutiny. At GEP Worldwide, I quantified a client's savings down to a defensible 6% figure, in presentations and spreadsheets clients could interrogate line by line. My engineering background gives me the quantitative grounding controlling work needs, and ESSEC has sharpened how I present that analysis to financial decision-makers.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
