Valeo — Recruitment Team

Paris 17e (Group HQ)

Re: Application for Alternant(e) – Contrôle de Gestion Achats (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Alternant(e) – Contrôle de Gestion Achats apprenticeship at Valeo in Paris 17e (Group HQ), starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in finance and controlling at a company I can stay with long-term.

Valeo's identity as a technology company that happens to build automotive components — rather than the reverse — is what draws me to it specifically. Its bets on ADAS, electrification, and software-defined mobility require the kind of cross-functional fluency between engineering and business thinking that my mechanical engineering degree and current strategy consulting work both trained me for. A group with an R&D-first culture spread across Cergy-Pontoise, Saint-Denis, Créteil, and Bobigny offers exactly the breadth of exposure I am looking for in a 24-month apprenticeship.

At FORVIA, part of my role is producing the technical and financial competitor analysis that the Finance and M&A teams use directly, so my numbers have to hold up to real scrutiny. At GEP Worldwide, I quantified a client's savings down to a defensible 6% figure, in presentations and spreadsheets clients could interrogate line by line. My engineering background gives me the quantitative grounding controlling work needs, and ESSEC has sharpened how I present that analysis to financial decision-makers.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
