Valeo — Recruitment Team

Cergy-Pontoise

Re: Application for Apprenti(e) en Performance de la chaîne d'approvisionnement (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Apprenti(e) en Performance de la chaîne d'approvisionnement apprenticeship at Valeo in Cergy-Pontoise, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in supply chain and project management at a company I can stay with long-term.

Valeo's identity as a technology company that happens to build automotive components — rather than the reverse — is what draws me to it specifically. Its bets on ADAS, electrification, and software-defined mobility require the kind of cross-functional fluency between engineering and business thinking that my mechanical engineering degree and current strategy consulting work both trained me for. A group with an R&D-first culture spread across Cergy-Pontoise, Saint-Denis, Créteil, and Bobigny offers exactly the breadth of exposure I am looking for in a 24-month apprenticeship.

Supply chain is where my engineering training and my commercial experience overlap. At NIT Calicut, I studied Supply Chain Management, Operations Research, and Production Systems Management as part of my mechanical engineering degree, and as an in-plant trainee at Hyundai Motor India, I saw plant operations and team structures firsthand. At GEP Worldwide, the procurement research I delivered was for a client's car fleet — a supply chain problem end to end.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
