Valeo — Recruitment Team

Paris 17e (Group HQ)

Re: Application for Chargé(e) de missions RH opérationnelles (HR Apprentice) (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Chargé(e) de missions RH opérationnelles (HR Apprentice) apprenticeship at Valeo in Paris 17e (Group HQ), starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in this function at a company I can stay with long-term.

Valeo's identity as a technology company that happens to build automotive components — rather than the reverse — is what draws me to it specifically. Its bets on ADAS, electrification, and software-defined mobility require the kind of cross-functional fluency between engineering and business thinking that my mechanical engineering degree and current strategy consulting work both trained me for. A group with an R&D-first culture spread across Cergy-Pontoise, Saint-Denis, Créteil, and Bobigny offers exactly the breadth of exposure I am looking for in a 24-month apprenticeship.

I hold a mechanical engineering degree from NIT Calicut with coursework spanning Operations Research, Project Management, Supply Chain Management, and Quality Planning and Analysis, and I currently work inside FORVIA's strategy function, collaborating weekly with Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal teams. That habit of working across functions, combined with the engineering foundation and the analytical training from my ESSEC MiM, is what I'd bring to this role — the ability to learn a function's specifics quickly and connect them to the bigger picture.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
