Carrefour — Recruitment Team
Massy

Re: Application for Analyste Stratégie PPF (F/H) en alternance (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Analyste Stratégie PPF (F/H) en alternance apprenticeship at Carrefour in Massy, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in strategy at a company I can build a career with rather than pass through.

Carrefour operates at a scale where a forecast that is slightly wrong is expensive in absolute terms every single week, and where the answer changes as fast as the assortment does. The role itself covers strategy analysis for the PPF scope. My engineering training in Operations Research and Quality Planning and Analysis is why the modelling side is familiar, and PowerBI and Excel are everyday tools rather than CV entries.

Strategy is my current job. At FORVIA I support the group's strategic plan directly — studying new markets and how they are evolving, assessing how product lines are positioned, and factoring in geopolitical shifts. I provide competitor analysis, technical and financial, to Finance, M&A, Sales, R&D, Operations, Purchasing and Legal. Before that I owned commercial outcomes at Endosys Technologies, including a product change that lifted sales volumes by 20%, and did client-facing analytical work at GEP Worldwide that produced a 6% saving.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
