Groupe Crédit Agricole — Recruitment Team
Montrouge

Re: Application for Assistant Gestionnaire Agency & Transaction Management H/F (12 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Assistant Gestionnaire Agency & Transaction Management H/F apprenticeship at Groupe Crédit Agricole in Montrouge, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in finance and controlling at a company I can build a career with rather than pass through.

Crédit Agricole is a banking group large enough that one function's decisions ripple across corporate, retail and international arms at once, so precision matters even in roles most banks would treat as back-office. The role itself covers loan agency and transaction administration for financing deals — work where being wrong is expensive and visible, not just inconvenient.

At FORVIA I work with financial information on competitors — reading results, comparing cost positions, and putting that in front of Finance and M&A alongside the technical picture. At GEP Worldwide I built the analysis behind a 6% procurement saving for a client, which meant defending the numbers, not just producing them. My engineering training in Operations Research and Quality Planning and Analysis is the reason I am comfortable with the modelling side, and PowerBI and Excel are everyday tools rather than things I list on a CV.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
