SYSTRA — Recruitment Team
Paris

Re: Application for Alternant Analyste Fusions et Acquisitions (M&A) F-H (apprenticeship, starting January 2027)

Dear Hiring Manager,

I am applying for the Alternant Analyste Fusions et Acquisitions (M&A) F-H apprenticeship at SYSTRA in Paris, starting January 2027. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in strategy at a company I can build a career with rather than pass through.

SYSTRA grows partly by acquiring engineering firms abroad, so the analysis behind a deal has to survive contact with a different market, a different regulatory regime and a different set of books before the group commits to it. The role itself covers supporting SYSTRA's M&A team on acquisition deals -- market and target analysis, deal committees (Executive Committee, M&A Committee, Vetting Committee, Supervisory Board) across roughly five acquisitions a year, mostly international.

Strategy is my current job. At FORVIA I support the group's strategic plan directly — studying new markets and how they are evolving, assessing how product lines are positioned, and factoring in geopolitical shifts. I provide competitor analysis, technical and financial, to Finance, M&A, Sales, R&D, Operations, Purchasing and Legal. Before that I owned commercial outcomes at Endosys Technologies, including a product change that lifted sales volumes by 20%, and did client-facing analytical work at GEP Worldwide that produced a 6% saving.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from January 2027 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
