Valeo — Recruitment Team

Saint-Denis

Re: Application for Alternance - Analyste des ventes (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Alternance - Analyste des ventes apprenticeship at Valeo in Saint-Denis, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in analysis at a company I can stay with long-term.

Valeo's identity as a technology company that happens to build automotive components — rather than the reverse — is what draws me to it specifically. Its bets on ADAS, electrification, and software-defined mobility require the kind of cross-functional fluency between engineering and business thinking that my mechanical engineering degree and current strategy consulting work both trained me for. A group with an R&D-first culture spread across Cergy-Pontoise, Saint-Denis, Créteil, and Bobigny offers exactly the breadth of exposure I am looking for in a 24-month apprenticeship.

Analysis has run through my whole career so far. As a Senior Analyst at GEP Worldwide, I turned raw data into decisions clients acted on, including the market research behind a 6% procurement saving. At FORVIA, I analyze competitors' technical and financial positioning for teams across Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal, so my analysis has to hold up under scrutiny from very different specialists at once. My mechanical engineering degree, with coursework in Operations Research and Quality Planning and Analysis, gave me the quantitative foundation for that, and PowerBI is part of my regular toolkit.

I'm currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree has given me a strong technical grounding, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
