Institut F2I — Recruitment Team
Paris

Re: Application for Business Developer (H/F) - Alternance (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Business Developer (H/F) - Alternance apprenticeship at Institut F2I in Paris, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in business development at a company I can stay with long-term.

Institut F2I's focus on training students for careers in insurance and banking means its business-development team has to sell an education product whose real value only becomes visible once graduates are established in their careers — a genuinely long sales cycle built on trust rather than immediate proof. That kind of relationship-driven, long-horizon business development is a different muscle than the fast commercial cycles I'm used to, and exactly the range I want to build.

Business development is where I started my career. As a Business Development Executive at Endosys Technologies, I marketed products through conferences, live demonstrations, and direct customer conversations, and one product change I proposed based on customer feedback raised sales volumes by 20%. At FORVIA, I now study how markets and competitors evolve as part of the strategic-planning process, so I've seen business development from both the front line and the analysis side.

I'm currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree has given me a strong technical grounding, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
