Phoenix OCP — Recruitment Team
Saint-Ouen-sur-Seine

Re: Application for Alternance 12 à 24 mois - Assistant acheteur (H/F) (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Alternance 12 à 24 mois - Assistant acheteur (H/F) apprenticeship at Phoenix OCP in Saint-Ouen-sur-Seine, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in procurement at a company I can stay with long-term.

Phoenix OCP is the leading pharmaceutical distributor in France, which means its purchasing function sits at a genuinely high-stakes intersection: cost discipline has to coexist with zero tolerance for supply failure, since the product reaching pharmacies and hospitals cannot simply be late. That kind of procurement, where the commercial and the mission-critical are inseparable, is where I want to apply the purchasing rigor I built at GEP Worldwide.

As a Senior Analyst at GEP Worldwide, I worked directly on procurement: my market research on car fleet sourcing delivered a 6% saving for the client, and I regularly drafted and analyzed RFIs, RFQs, and RFPs from the buyer's side. At FORVIA, I now support Purchasing with competitor and market intelligence for their sourcing decisions. My mechanical engineering background means I can read a technical spec and a commercial term sheet equally well, which helps when cost, quality, and delivery all come up in the same negotiation.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
