Renault Group — Recruitment Team
Boulogne-Billancourt

Re: Application for Assistant Marketing Digital Véhicules Utilitaires (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Assistant Marketing Digital Véhicules Utilitaires apprenticeship at Renault Group in Boulogne-Billancourt, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in product and marketing at a company I can stay with long-term.

Renault Group's transformation over the past few years — the shift toward Ampere as a dedicated software-and-electric vehicle entity, the repositioning of Dacia and Alpine, the broader "Renaulution" strategy — is precisely the kind of large-scale strategic pivot I want to support from the inside rather than analyze from a distance. The Group's Technocentre in Guyancourt and headquarters in Boulogne-Billancourt bring together the engineering depth and commercial ambition that a mechanical engineer turned business consultant like myself is built to bridge.

My path into marketing runs through two different roles: at FORVIA, I study the positioning of product lines and how markets evolve around them as part of the strategic-planning process; earlier, at Endosys Technologies, I was on the front line marketing physical products through conferences, live demonstrations, and direct customer conversations, and I translated what I heard back into product changes that increased sales. ESSEC's Marketing Management coursework builds on that practical foundation.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
