Schiaparelli — Recruitment Team

Ville de Paris

Re: Application for Apprenti Assistant Logistique & Transport International (Luxe) – Opérations & Freight Forwarding (H/F/X) (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Apprenti Assistant Logistique & Transport International (Luxe) – Opérations & Freight Forwarding (H/F/X) apprenticeship at Schiaparelli in Ville de Paris, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in supply chain at a company I can stay with long-term.

Schiaparelli's revival as a historic haute couture house means its logistics function has to move genuinely irreplaceable, one-of-a-kind pieces internationally — for shows, clients, and press — with a level of care that standard freight logistics never has to consider. Managing logistics where a single shipment can be literally impossible to replace is exactly the kind of high-stakes operational precision I find most interesting.

Supply chain is where my engineering training and my commercial experience overlap. At NIT Calicut, I studied Supply Chain Management, Operations Research, and Production Systems Management as part of my mechanical engineering degree, and as an in-plant trainee at Hyundai Motor India, I saw plant operations and team structures firsthand. At GEP Worldwide, the procurement research I delivered was for a client's car fleet — a supply chain problem end to end.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
