Accor — Recruitment Team
Paris

Re: Application for Alternance - Product Owner (12 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Alternance - Product Owner apprenticeship at Accor in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in product and marketing at a company I can build a career with rather than pass through.

Accor buys for a hotel group rather than a factory, which puts indirect procurement at the centre rather than off to one side — IT, professional services and marketing spend are where a great deal of the group's cost base actually sits, and a category strategy has to hold across dozens of countries and brands at once. The role itself covers product ownership for the digital platforms Procurement uses — e-ordering, supplier directory and inventory management. Indirect categories are precisely what I worked on at GEP Worldwide, where the RFIs, RFQs and RFPs I drafted and the analysis behind them produced a 6% saving for a client.

At FORVIA I assess how product lines are positioned and how the markets around them are moving, and I own the group's weekly newsletter, which is a marketing problem as much as an editorial one. At Endosys Technologies I marketed products through conferences, demonstrations and direct meetings, and took customer feedback back into the product itself — one design change I suggested increased sales volumes by 20%. ESSEC's Marketing Management coursework has given me the structure to go with that hands-on experience.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
