Delicorner — Recruitment Team
Saint-Ouen-sur-Seine

Re: Application for International Purchasing & Supply Analyst - Alternance (12 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the International Purchasing & Supply Analyst - Alternance apprenticeship at Delicorner in Saint-Ouen-sur-Seine, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in purchasing at a company I can build a career with rather than pass through.

A smaller company means the purchasing and supply work is owned rather than divided, and the person doing it sees the whole consequence of a decision instead of one slice of it. The role itself covers international purchasing and supply analysis, owned end to end rather than split across a department — the breadth is the appeal, and it suits someone who has already worked across sourcing, supplier relationships and analysis rather than in one of them.

Purchasing is where my experience is most directly transferable. At GEP Worldwide I drafted RFIs, RFQs and RFPs, analysed the responses, and ran the market research behind a car-fleet procurement decision that saved a client 6%. At FORVIA I now produce competitor and cost analysis that Purchasing uses alongside Finance, M&A, Sales, R&D, Operations and Legal, so I am used to sourcing questions being argued across functions rather than settled inside one. My two years at Endosys Technologies were spent on the supplier's side of that table, negotiating and holding commercial relationships, which is a useful thing to have seen before sitting on the buyer's side of it.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
