Experimental Group — Recruitment Team
Paris 9e

Re: Application for Alternance Analyste Financier, M&A [H/F] (apprenticeship, starting January 2027)

Dear Hiring Manager,

I am applying for the Alternance Analyste Financier, M&A [H/F] apprenticeship at Experimental Group in Paris 9e, starting January 2027. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an analytical apprenticeship at a company I can build a career with rather than pass through.

A hospitality group that grows mainly by acquiring hotels needs the financial case for each deal to hold up well after the signature, once the property is actually running. The role itself covers supporting the M&A team and the CFO on hotel acquisition projects across Europe -- due diligence, valuation and deal-process work across every stage of an acquisition.

Analysis is what I do daily. At FORVIA I deliver competitor and market analysis — technical and financial — to Finance, M&A, Sales, R&D, Operations, Purchasing and Legal, which means the same finding has to hold up for seven audiences with different questions. I also own the group's weekly newsletter end to end, so I am practised at turning scattered inputs into something people actually read and act on. Before that, at GEP Worldwide, I turned client data into recommendations that produced a measurable 6% saving, and presented them to the client myself.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from January 2027 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
