HSBC — Recruitment Team
Paris 16e

Re: Application for Alternance Analyste Structured Finance (Titrisation & Fund Finance) (f/m/d) (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Alternance Analyste Structured Finance (Titrisation & Fund Finance) (f/m/d) apprenticeship at HSBC in Paris 16e, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an analytical apprenticeship at a company I can build a career with rather than pass through.

Structured finance is analysis with no hiding place: a securitisation is only as sound as the assumptions underneath it, and the team is small enough that the work is visible. The role itself covers structured financing solutions for European investment-banking clients — securitisations, public and private, alongside a team of seven working with London. At FORVIA the same finding has to hold up for seven internal audiences asking different questions, which is the discipline this work rewards, and I am used to operating in English across borders.

Analysis is what I do daily. At FORVIA I deliver competitor and market analysis — technical and financial — to Finance, M&A, Sales, R&D, Operations, Purchasing and Legal, which means the same finding has to hold up for seven audiences with different questions. I also own the group's weekly newsletter end to end, so I am practised at turning scattered inputs into something people actually read and act on. Before that, at GEP Worldwide, I turned client data into recommendations that produced a measurable 6% saving, and presented them to the client myself.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
