KPMG France — Recruitment Team
Paris

Re: Application for Alternant - Finance Strategy & Performance F-H (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Alternant - Finance Strategy & Performance F-H apprenticeship at KPMG France in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in finance and controlling at a company I can build a career with rather than pass through.

Consulting is where I want to keep building, and KPMG's advantage for an apprentice is the sheer variety — the same method has to work on a different client every engagement, which is the fastest way to find out which parts of your method are real. The role itself covers performance management work — business plan design, financial modelling, and the digital transformation of the finance function, and it builds directly on the strategic planning I do at FORVIA and the client-facing analytical work I did at GEP Worldwide.

At FORVIA I work with financial information on competitors — reading results, comparing cost positions, and putting that in front of Finance and M&A alongside the technical picture. At GEP Worldwide I built the analysis behind a 6% procurement saving for a client, which meant defending the numbers, not just producing them. My engineering training in Operations Research and Quality Planning and Analysis is the reason I am comfortable with the modelling side, and PowerBI and Excel are everyday tools rather than things I list on a CV.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
