KPMG France — Recruitment Team
Courbevoie

Re: Application for Consultant Alternant Finance Strategy & Transformation F-H (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Consultant Alternant Finance Strategy & Transformation F-H apprenticeship at KPMG France in Courbevoie, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in strategy and consulting at a company I can build a career with rather than pass through.

Consulting is where I want to keep building, and KPMG's advantage for an apprentice is the sheer variety — the same method has to work on a different client every engagement, which is the fastest way to find out which parts of your method are real. The role itself covers finance transformation consulting across a portfolio of clients rather than a single balance sheet, and it builds directly on the strategic planning I do at FORVIA and the client-facing analytical work I did at GEP Worldwide.

Strategy is my current job. At FORVIA I support the group's strategic plan directly — studying new markets and how they are evolving, assessing how product lines are positioned, and factoring in geopolitical shifts. I provide competitor analysis, technical and financial, to Finance, M&A, Sales, R&D, Operations, Purchasing and Legal. Before that I owned commercial outcomes at Endosys Technologies, including a product change that lifted sales volumes by 20%, and did client-facing analytical work at GEP Worldwide that produced a 6% saving.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
