Schneider Electric — Recruitment Team
Rueil-Malmaison

Re: Application for Alternance - Analyste Pricing Intelligence - BAC+4/5 - Rueil-Malmaison - F/H (24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Alternance - Analyste Pricing Intelligence - BAC+4/5 - Rueil-Malmaison - F/H apprenticeship at Schneider Electric in Rueil-Malmaison, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an analytical apprenticeship at a company I can build a career with rather than pass through.

Schneider Electric prices across a portfolio wide enough that a pricing decision in one segment can look right in isolation and still be wrong for the group, which is exactly the kind of cross-check that turns pricing analysis into something harder than a spreadsheet exercise. The role itself covers pricing data analysis and economic intelligence — price recommendation analyses and price-gap monitoring, reporting to the VP of Commercial Policy France.

Analysis is what I do daily. At FORVIA I deliver competitor and market analysis — technical and financial — to Finance, M&A, Sales, R&D, Operations, Purchasing and Legal, which means the same finding has to hold up for seven audiences with different questions. I also own the group's weekly newsletter end to end, so I am practised at turning scattered inputs into something people actually read and act on. Before that, at GEP Worldwide, I turned client data into recommendations that produced a measurable 6% saving, and presented them to the client myself.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
