Sia Partners — Recruitment Team
Paris

Re: Application for Alternance - Bras Droit de CFO - International Finance Projects Specialist (H/F) (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Alternance - Bras Droit de CFO - International Finance Projects Specialist (H/F) apprenticeship at Sia Partners in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in finance and controlling at a company I can build a career with rather than pass through.

Sia Partners sells advisory work, so its own internal finance function has to hold itself to the standard it recommends to clients — a CFO's office at a firm like this is watched more closely than most. The role itself covers management control, project management and consulting for the Group CFO's office, working with the management-control team in Lyon and accounting teams across Sia Partners' 15 other countries. Endosys Technologies is where I first had to make a case stand on its own in front of people with no reason to take it on faith, which is close to the posture international finance projects work requires.

At FORVIA I work with financial information on competitors — reading results, comparing cost positions, and putting that in front of Finance and M&A alongside the technical picture. At GEP Worldwide I built the analysis behind a 6% procurement saving for a client, which meant defending the numbers, not just producing them. My engineering training in Operations Research and Quality Planning and Analysis is the reason I am comfortable with the modelling side, and PowerBI and Excel are everyday tools rather than things I list on a CV.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
