Ubisoft — Recruitment Team
Paris

Re: Application for Business Development Marketing Assistant – Alternance (12 mois) Septembre 2026 (F/H/NB) (12 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Business Development Marketing Assistant – Alternance (12 mois) Septembre 2026 (F/H/NB) apprenticeship at Ubisoft in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in business development at a company I can build a career with rather than pass through.

Ubisoft's business development question is an unusual one because the brand is the asset — licensing, transmedia and partnerships all trade on whether a game's world means something to people, so a commercial decision is also an editorial one. The role itself covers marketing for Strategic Partnerships and Business Development — licensing-out, transmedia, brand partnerships and sponsoring across the whole brand portfolio. At Endosys Technologies I held customer relationships myself and fed what I heard back into the product, including a design change that lifted sales volumes by 20%, and at FORVIA I study how product lines are positioned in markets that will not sit still.

I have carried commercial responsibility directly. For two years at Endosys Technologies I marketed products through conferences, meetings and demonstrations, held the customer relationships myself, and fed what I heard back into the product — one lock design change I proposed raised sales volumes by 20%. That is the part of business development I care about: the loop from customer conversation to product decision to revenue. At FORVIA I now work the same question from the strategy side, studying new markets and how product lines are positioned within them.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
