Air Liquide — Recruitment Team
Paris

Re: Application for ALTERNANCE - SIÈGE SOCIAL - Chargé de consolidation (H/F) (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the ALTERNANCE - SIÈGE SOCIAL - Chargé de consolidation (H/F) apprenticeship at Air Liquide in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in finance and controlling at a company I can build a career with rather than pass through.

Air Liquide runs industrial gas supply as critical infrastructure for its customers, which means the group's own internal reporting has to be exact enough to support decisions well beyond finance. The role itself covers group financial consolidation at the head office — learning and development within an open, collaborative reporting team — the kind of consolidation work that is invisible when it is right and immediately obvious when it is not.

At FORVIA I work with financial information on competitors — reading results, comparing cost positions, and putting that in front of Finance and M&A alongside the technical picture. At GEP Worldwide I built the analysis behind a 6% procurement saving for a client, which meant defending the numbers, not just producing them. My engineering training in Operations Research and Quality Planning and Analysis is the reason I am comfortable with the modelling side, and PowerBI and Excel are everyday tools rather than things I list on a CV.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
