Allianz — Recruitment Team
Paris 2e

Re: Application for Working Student/Apprentice - Business Development & Sales Support (f/m/d) (12 months apprenticeship, starting January 2027)

Dear Hiring Manager,

I am applying for the Working Student/Apprentice - Business Development & Sales Support (f/m/d) apprenticeship at Allianz in Paris 2e, starting January 2027. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in business development at a company I can build a career with rather than pass through.

Allianz manages money and risk at a scale where a modelling assumption that is slightly off does not stay a rounding error — it compounds across a book large enough that small errors become real exposure. The role itself covers supporting the Retail France Business Development team at Allianz Global Investors -- servicing distribution partners, commercial materials and client-facing reporting, work where the model has to be defensible, not just plausible.

I have carried commercial responsibility directly. For two years at Endosys Technologies I marketed products through conferences, meetings and demonstrations, held the customer relationships myself, and fed what I heard back into the product — one lock design change I proposed raised sales volumes by 20%. That is the part of business development I care about: the loop from customer conversation to product decision to revenue. At FORVIA I now work the same question from the strategy side, studying new markets and how product lines are positioned within them.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from January 2027 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
