Essity — Recruitment Team
Saint-Ouen

Re: Application for Assistant Marketing Chef de Produit Santé - Alternance - H/F (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Assistant Marketing Chef de Produit Santé - Alternance - H/F apprenticeship at Essity in Saint-Ouen, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in product and marketing at a company I can build a career with rather than pass through.

Essity sells health and hygiene products where the buying decision is rarely made by the person using the product, so marketing there has to speak to clinicians and purchasers as much as to the end patient. The role itself covers product marketing support for Brand Managers across Compression, Wound Care and Physiotherapy — campaign work and competitive/portfolio analysis — a market read that has to work for more than one audience at once.

At FORVIA I assess how product lines are positioned and how the markets around them are moving, and I own the group's weekly newsletter, which is a marketing problem as much as an editorial one. At Endosys Technologies I marketed products through conferences, demonstrations and direct meetings, and took customer feedback back into the product itself — one design change I suggested increased sales volumes by 20%. ESSEC's Marketing Management coursework has given me the structure to go with that hands-on experience.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
