Havas — Recruitment Team
Puteaux

Re: Application for HAVAS MEDIA FRANCE - ALTERNANCE - ASSISTANT(E) NEW BUSINESS - F/H (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the HAVAS MEDIA FRANCE - ALTERNANCE - ASSISTANT(E) NEW BUSINESS - F/H apprenticeship at Havas in Puteaux, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in business development at a company I can build a career with rather than pass through.

Havas wins work by convincing a client its recommendation beats four other agencies', and new business is where that argument actually gets made — against a deadline, with the competitive picture as the raw material. The role itself covers developing the client portfolio and running the RFP process — competitive analysis to spot market trends and opportunities, then contributing to the recommendation and coordinating teams for local and international pitches. Answering RFPs is the mirror image of what I did at GEP Worldwide, where I drafted the RFIs, RFQs and RFPs and analysed what came back, and competitive analysis is my daily work at FORVIA.

I have carried commercial responsibility directly. For two years at Endosys Technologies I marketed products through conferences, meetings and demonstrations, held the customer relationships myself, and fed what I heard back into the product — one lock design change I proposed raised sales volumes by 20%. That is the part of business development I care about: the loop from customer conversation to product decision to revenue. At FORVIA I now work the same question from the strategy side, studying new markets and how product lines are positioned within them.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
