Hermès — Recruitment Team
Paris

Re: Application for ALTERNANCE - Assistant E-Retail Merchandiser Business Analyst H/F (12 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the ALTERNANCE - Assistant E-Retail Merchandiser Business Analyst H/F apprenticeship at Hermès in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an analytical apprenticeship at a company I can build a career with rather than pass through.

Hermès is unusual in that its production is genuinely constrained by craft, which makes the commercial and supply questions harder rather than easier — demand cannot simply be met by making more. The role itself covers e-retail merchandising analysis, where commercial judgement and the numbers behind it have to arrive together — operating where those limits are respected rather than engineered away, which is a more interesting problem than optimising a system with slack in it.

Analysis is what I do daily. At FORVIA I deliver competitor and market analysis — technical and financial — to Finance, M&A, Sales, R&D, Operations, Purchasing and Legal, which means the same finding has to hold up for seven audiences with different questions. I also own the group's weekly newsletter end to end, so I am practised at turning scattered inputs into something people actually read and act on. Before that, at GEP Worldwide, I turned client data into recommendations that produced a measurable 6% saving, and presented them to the client myself.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
