Louis Vuitton — Recruitment Team
Paris

Re: Application for Alternance - Assistant.e Achat d'Art, Production et Services Créatifs (H/F) (12-24 months apprenticeship, starting January 2027)

Dear Hiring Manager,

I am applying for the Alternance - Assistant.e Achat d'Art, Production et Services Créatifs (H/F) apprenticeship at Louis Vuitton in Paris, starting January 2027. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in purchasing at a company I can build a career with rather than pass through.

Louis Vuitton runs its own ateliers and its own campaigns at a scale where consistency of craft has to survive contact with production deadlines. The role itself covers buying production and creative services for advertising campaigns — print, film and digital content — buying that protects the standard rather than trading it away for speed.

Purchasing is where my experience is most directly transferable. At GEP Worldwide I drafted RFIs, RFQs and RFPs, analysed the responses, and ran the market research behind a car-fleet procurement decision that saved a client 6%. At FORVIA I now produce competitor and cost analysis that Purchasing uses alongside Finance, M&A, Sales, R&D, Operations and Legal, so I am used to sourcing questions being argued across functions rather than settled inside one. My two years at Endosys Technologies were spent on the supplier's side of that table, negotiating and holding commercial relationships, which is a useful thing to have seen before sitting on the buyer's side of it.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from January 2027 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
