PUIG — Recruitment Team
Paris

Re: Application for Alternance - Assistant Marketing Operationnel International Rabanne & JPG - Septembre 2026 (H-F) (12 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Alternance - Assistant Marketing Operationnel International Rabanne & JPG - Septembre 2026 (H-F) apprenticeship at PUIG in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in product and marketing at a company I can build a career with rather than pass through.

PUIG runs houses with genuinely distinct identities — Rabanne and Jean Paul Gaultier do not behave like one brand with two labels — inside a single group's operations. That tension between creative independence and shared execution is the interesting problem. The role itself covers international operational marketing across two houses at once, which means the same plan has to survive several markets.

At FORVIA I assess how product lines are positioned and how the markets around them are moving, and I own the group's weekly newsletter, which is a marketing problem as much as an editorial one. At Endosys Technologies I marketed products through conferences, demonstrations and direct meetings, and took customer feedback back into the product itself — one design change I suggested increased sales volumes by 20%. ESSEC's Marketing Management coursework has given me the structure to go with that hands-on experience.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
