Siemens — Recruitment Team
Île-de-France

Re: Application for Finance Data Analyst - Apprenticeship (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Finance Data Analyst - Apprenticeship apprenticeship at Siemens in Île-de-France, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in finance and controlling at a company I can build a career with rather than pass through.

Siemens pairs industrial depth with the financial discipline of a group operating across many businesses, which suits someone who came to management through engineering. The role itself covers business insight delivered through visualisation tools, as the reference point for the group's BI applications — exactly where my mechanical engineering training and my current strategy and analysis work meet.

At FORVIA I work with financial information on competitors — reading results, comparing cost positions, and putting that in front of Finance and M&A alongside the technical picture. At GEP Worldwide I built the analysis behind a 6% procurement saving for a client, which meant defending the numbers, not just producing them. My engineering training in Operations Research and Quality Planning and Analysis is the reason I am comfortable with the modelling side, and PowerBI and Excel are everyday tools rather than things I list on a CV.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
