Axys — Recruitment Team

Île-de-France

Re: Application for Consultant junior en conduite du changement (H/F) (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Consultant junior en conduite du changement (H/F) apprenticeship at Axys in Île-de-France, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in strategy and consulting at a company I can stay with long-term.

Axys works on change management for organizations navigating digital and organizational transformation, which means its consultants have to translate strategic decisions made at the top into changes that actually stick with the people doing the work. That gap — between a strategy decided and a strategy adopted — is one I see constantly at FORVIA, where the analysis I produce only matters if the teams using it actually change what they do.

Strategy is my current job. At FORVIA, I support the strategic plan directly — studying new markets, tracking competitors and product lines, and factoring in geopolitical shifts. Before that, as a Business Development Executive at Endosys Technologies, I owned commercial outcomes directly, including a product change that raised sales volumes by 20%. ESSEC's Strategy and Management coursework has sharpened that experience, and I want to keep working on strategy that actually gets implemented.

I'm currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree has given me a strong technical grounding, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
