CHANEL — Recruitment Team

Paris

Re: Application for Alternance - Assistant(e) Contrôle de Gestion Supply Chain - Mode - Septembre 2026 - H/F/X (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Alternance - Assistant(e) Contrôle de Gestion Supply Chain - Mode - Septembre 2026 - H/F/X apprenticeship at CHANEL in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in finance and controlling at a company I can build a career with rather than pass through.

CHANEL runs a supply chain against a calendar it does not control and a standard it will not lower, which makes performance work there a question of holding quality constant while everything else moves. The role itself covers management control for the Fashion supply chain. Getting departments that had been solving their own problems separately to solve them together is what lifted delivery satisfaction 10% at Endosys Technologies, and it is most of what a flow reorganisation actually asks for.

At FORVIA I work with financial information on competitors — reading results, comparing cost positions, and putting that in front of Finance and M&A alongside the technical picture. At GEP Worldwide I built the analysis behind a 6% procurement saving for a client, which meant defending the numbers, not just producing them. My engineering training in Operations Research and Quality Planning and Analysis is the reason I am comfortable with the modelling side, and PowerBI and Excel are everyday tools rather than things I list on a CV.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
