Galleries Lafayette — Recruitment Team
Paris

Re: Application for Alternant(e) Assistant(e) responsable flux et marchandises F/H (24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Alternant(e) Assistant(e) responsable flux et marchandises F/H apprenticeship at Galleries Lafayette in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in supply chain at a company I can build a career with rather than pass through.

Galleries Lafayette buys for a floor where the assortment is the proposition — a partner who does not deliver is a visible hole in the store, not a line in a report. The role itself covers merchandise flow management within Supply Chain / Logistics. Prospecting, negotiating commercial terms and holding the relationship afterwards is what I did for two years at Endosys Technologies, from the supplier's side of that table.

My engineering degree covered Supply Chain Management, Operations Research and Management of Production Systems, and I have since worked on the commercial consequences of those mechanics rather than only the theory. At Endosys Technologies I raised delivery satisfaction by 10% by getting departments that had been solving their own problems separately to solve them together — which is most of what supply chain work actually is. At FORVIA I analyse how product lines are positioned and how markets shift, including the geopolitical factors that decide whether a supply plan survives contact with reality.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
