Publicis Groupe — Recruitment Team
Paris

Re: Application for Alternance - Finance Transformation (FR/EN) - Septembre 2026 (12-24 months apprenticeship, starting September 2026)

Dear Hiring Manager,

I am applying for the Alternance - Finance Transformation (FR/EN) - Septembre 2026 apprenticeship at Publicis Groupe in Paris, starting September 2026. I have three years of experience across business development, consulting and analysis, most recently as a Strategy and Marketing Corporate Consultant at FORVIA in Paris, and I am looking for an apprenticeship in finance and controlling at a company I can build a career with rather than pass through.

Publicis is the world's largest communications group, so a finance process that works there has to hold across more than 500 legal entities in over 100 countries — consistency at that scale is itself the hard problem, before anyone asks whether a single number is correct. The role itself covers multiple finance-transformation projects, reporting to the Finance Transformation Director, mapping processes and identifying where they can be improved. At FORVIA the same finding has to hold up for seven internal audiences with different questions, so building something that has to work the same way everywhere is a familiar discipline.

At FORVIA I work with financial information on competitors — reading results, comparing cost positions, and putting that in front of Finance and M&A alongside the technical picture. At GEP Worldwide I built the analysis behind a 6% procurement saving for a client, which meant defending the numbers, not just producing them. My engineering training in Operations Research and Quality Planning and Analysis is the reason I am comfortable with the modelling side, and PowerBI and Excel are everyday tools rather than things I list on a CV.

I am currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that I completed a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), covering Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Management of Production Systems. The engineering degree is where my analytical edge comes from — it taught me to break a problem down to what can actually be measured before arguing about it — and ESSEC has given me the strategic and commercial judgement to put that to work.

I am available from September 2026 and would welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,
Giridhar Dhananjay Khaza Venkata
