Accenture — Recruitment Team

Paris

Re: Application for Consultant(e) Junior en apprentissage - Accenture Strategy (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Consultant(e) Junior en apprentissage - Accenture Strategy apprenticeship at Accenture in Paris, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in strategy and consulting at a company I can stay with long-term.

Accenture's scale as one of the world's largest consulting and technology-services firms means its Strategy practice has to solve genuinely different problems for genuinely different clients every engagement, with no single playbook that works twice. That range is exactly what I want from a consulting apprenticeship, building on the strategic-planning work I already do at FORVIA and the client-facing analytical work from GEP Worldwide, across a portfolio of clients rather than a single company.

Strategy is my current job. At FORVIA, I support the strategic plan directly — studying new markets, tracking competitors and product lines, and factoring in geopolitical shifts. Before that, as a Business Development Executive at Endosys Technologies, I owned commercial outcomes directly, including a product change that raised sales volumes by 20%. ESSEC's Strategy and Management coursework has sharpened that experience, and I want to keep working on strategy that actually gets implemented.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
