Alten — Recruitment Team

Boulogne-Billancourt (92)

## **Re: Application for Alternance Contract Manager H/F (24-month apprenticeship, starting September 2026)**

Dear Hiring Manager,

I'm applying for the Alternance Contract Manager H/F apprenticeship at Alten in Boulogne-Billancourt (92), starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in this function at a company I can stay with long-term.

Alten's scale and reach as one of Europe's largest engineering and technology consulting groups, spanning automotive, aerospace, telecoms, and more, is exactly the kind of multi-industry exposure I want from an apprenticeship. My own path so far — mechanical engineering, a US-based consultancy, and now strategy consulting inside an automotive group — has been about building fluency across functions and sectors rather than specializing narrowly and early, which is why Alten's model appeals to me directly.

I hold a mechanical engineering degree from NIT Calicut with coursework spanning Operations Research, Project Management, Supply Chain Management, and Quality Planning and Analysis, and I currently work inside FORVIA's strategy function, collaborating weekly with Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal teams. That habit of working across functions, combined with the engineering foundation and the analytical training from my ESSEC MiM, is what I'd bring to this role — the ability to learn a function's specifics quickly and connect them to the bigger picture.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

**Giridhar Dhananjay Khaza Venkata**
