CGI Business Consulting — Recruitment Team
Paris

**Re: Application for Alternance : Chargé de communication interne et pilotage de projet H/F
(24-month apprenticeship, starting September 2026)**

Dear Hiring Manager,

I'm applying for the Alternance : Chargé de communication interne et pilotage de projet H/F apprenticeship at CGI Business Consulting in Paris, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in business development at a company I can stay with long-term.

CGI Business Consulting's work sits at the intersection of management consulting and IT delivery, which means internal communication and project governance have to keep genuinely technical transformation programs aligned with the business outcomes they're meant to serve.

Business development is where I started my career. As a Business Development Executive at Endosys Technologies, I marketed products through conferences, live demonstrations, and direct customer conversations, and one product change I proposed based on customer feedback raised sales volumes by 20%. At FORVIA, I now study how markets and competitors evolve as part of the strategic-planning process, so I've seen business development from both the front line and the analysis side.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
