FORVIA — Recruitment Team

Brières-les-Scellés (91)

Re: Application for Apprenti(e) Ingénieur(e) Métrologie (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Apprenti(e) Ingénieur(e) Métrologie apprenticeship within FORVIA, in Brières-les-Scellés (91), starting September 2026 for a 24-month contract. I joined FORVIA earlier this year as a Strategy and Marketing Corporate Consultant Intern, and I'd like to turn that into a longer commitment with more functional depth, in this function.

Having joined FORVIA earlier this year as a Strategy and Marketing Corporate Consultant Intern, I already understand the Group's strategic priorities and its cross-functional rhythm across Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal, including owning a weekly newsletter that multiple teams rely on. An apprenticeship would let me build on that instead of starting over somewhere new.

I hold a mechanical engineering degree from NIT Calicut with coursework spanning Operations Research, Project Management, Supply Chain Management, and Quality Planning and Analysis, and I currently work inside FORVIA's strategy function, collaborating weekly with Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal teams. That habit of working across functions, combined with the engineering foundation and the analytical training from my ESSEC MiM, is what I'd bring to this role — the ability to learn a function's specifics quickly and connect them to the bigger picture.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
