FORVIA — Recruitment Team

Paris (75)

Re: Application for Data Scientist Apprentice (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Data Scientist Apprentice apprenticeship within FORVIA, in Paris (75), starting September 2026 for a 24-month contract. I joined FORVIA earlier this year as a Strategy and Marketing Corporate Consultant Intern, and I'd like to turn that into a longer commitment with more functional depth, in analysis.

Having joined FORVIA earlier this year as a Strategy and Marketing Corporate Consultant Intern, I already understand the Group's strategic priorities and its cross-functional rhythm across Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal, including owning a weekly newsletter that multiple teams rely on. An apprenticeship would let me build on that instead of starting over somewhere new.

Analysis has run through my whole career so far. As a Senior Analyst at GEP Worldwide, I turned raw data into decisions clients acted on, including the market research behind a 6% procurement saving. At FORVIA, I analyze competitors' technical and financial positioning for teams across Finance, M&A, Sales, R&D, Operations, Purchasing, and Legal, so my analysis has to hold up under scrutiny from very different specialists at once. My mechanical engineering degree, with coursework in Operations Research and Quality Planning and Analysis, gave me the quantitative foundation for that, and PowerBI is part of my regular toolkit.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
