Fédération Nationale du Crédit Agricole — Recruitment Team
Paris

Re: Application for Alternance - Corporate Innovation Consultant H/F (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Alternance - Corporate Innovation Consultant H/F apprenticeship at Fédération Nationale du Crédit Agricole in Paris, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in strategy and consulting at a company I can stay with long-term.

The Fédération Nationale du Crédit Agricole coordinates innovation strategy across France's network of regional Crédit Agricole banks, which means its consultants have to design innovation programs that can actually be adopted by dozens of semi-autonomous regional banks at once — a genuinely different challenge from innovating inside a single unified company.

Strategy is my current job. At FORVIA, I support the strategic plan directly — studying new markets, tracking competitors and product lines, and factoring in geopolitical shifts. Before that, as a Business Development Executive at Endosys Technologies, I owned commercial outcomes directly, including a product change that raised sales volumes by 20%. ESSEC's Strategy and Management coursework has sharpened that experience, and I want to keep working on strategy that actually gets implemented.

I'm currently completing a Master in Management at ESSEC Business School (ranked #10 globally in the Financial Times' 2025 Masters in Management ranking), with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree gives me a technical grounding most business-school candidates don't have, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
