Renault Group — Recruitment Team
Guyancourt

Re: Application for Chef de Projet Achats Modules (H/F) (24-month apprenticeship, starting September 2026)

Dear Hiring Manager,

I'm applying for the Chef de Projet Achats Modules (H/F) apprenticeship at Renault Group in Guyancourt, starting September 2026 for a 24-month contract. I have three years of experience in business development, strategy consulting, and analysis, most recently as a Strategy and Marketing Corporate Consultant Intern at FORVIA, and I'm looking for an apprenticeship in procurement at a company I can stay with long-term.

Renault Group's transformation over the past few years — the shift toward Ampere as a dedicated software-and-electric vehicle entity, the repositioning of Dacia and Alpine, the broader "Renaulution" strategy — is precisely the kind of large-scale strategic pivot I want to support from the inside rather than analyze from a distance. The Group's Technocentre in Guyancourt and headquarters in Boulogne-Billancourt bring together the engineering depth and commercial ambition that a mechanical engineer turned business consultant like myself is built to bridge.

As a Senior Analyst at GEP Worldwide, I worked directly on procurement: my market research on car fleet sourcing delivered a 6% saving for the client, and I regularly drafted and analyzed RFIs, RFQs, and RFPs from the buyer's side. At FORVIA, I now support Purchasing with competitor and market intelligence for their sourcing decisions. My mechanical engineering background means I can read a technical spec and a commercial term sheet equally well, which helps when cost, quality, and delivery all come up in the same negotiation.

I'm currently completing a Master in Management at ESSEC Business School, with coursework in Strategy and Management, Marketing Management, and People and Organizations. Before that, I did a B.Tech in Mechanical Engineering at the National Institute of Technology Calicut (ranked #21 in India, NIRF 2025), with coursework in Operations Research, Project Management, Supply Chain Management, Quality Planning and Analysis, and Production Systems Management. The engineering degree has given me a strong technical grounding, and ESSEC has given me the strategy and commercial side.

I'm available to start in September 2026, and I'd welcome the chance to discuss how I could contribute to your team. Thank you for considering my application.

Sincerely,

Giridhar Dhananjay Khaza Venkata
